

Growing Blue International Conference

2nd Edition – Virtual Event Invite

Policy to Practice

Community-based Managed Access and Management of Coastal Zones

19 November 2021 | 2:00pm – 3:30pm UTC+2 (Maputo time) | Virtual Event

Convened By: Rare (with support from Blue Action Fund)

Language: English & Portuguese

Speakers include:

ADNAP – Cassamo Hassane Junior

Blue Action Fund – Dr. Heike Henn

UN FAO - TBC

Rare – Dr. Atanasio Brito & Rocky S. Tirona

WCS – Dr. Erwan Sola

World Bank – Simeao Lopez

WWF – Rodrigo Fernandez

About: As part of the 2nd Growing Blue International Conference convened by the national government of Mozambique, this virtual event will describe and discuss a provincial approach to sustainable and resilient small-scale fisheries in Mozambique.

It will draw from practices of Rare's global marine program, Fish Forever, in countries and geographies with similar governance models, highlighting both the core components of successful co-management approaches and the roles of communities, governments and other stakeholders. The event will celebrate partners' achievements such as the implementation of Mozambique's first local community-based managed access areas and reserves (CMA+R). Participants will explore how government partners, civil society actors, local communities and funders can build on first success stories and jointly take a provincial approach to small-scale fisheries in Mozambique that accelerates local, integrated implementation of the Sustainable Development Goals, the UN Convention on Biodiversity's post-2020 Global Biodiversity Framework and, ultimately, delivers on a sustainable Blue Economy.

The event will also contribute to the efforts around World Fisheries Day, as well as the 2022 International Year of Artisanal Fisheries and Aquaculture that will be launched in November 2021, celebrating the contributions of small-scale fishers and their critical role in the Blue Economy.
